

OVEREND AWARD FOR GRADUATE RESEARCH IN PHYSICAL CHEMISTRY

Purpose:

To recognize an outstanding graduate student researcher in the area of physical chemistry.

Eligibility:

Graduate students in chemistry or chemical physics may be nominated up to two times for this award.

Award:

A travel award of up to \$600 will be made available to the awardee for support of travel to a scientific conference of his or her choice. An award certificate will be presented at the first year student welcoming party in the Fall each year.

Award Procedure:

Nominations for this award should come from the candidate's research advisor. A nomination consists of one letter of recommendation, reprints and preprints of the candidate's research papers, a one page vitae, and a publication list. The nominations are due on Friday, October 12, in the mailbox of the physical chemistry coordinator. The awardee will be chosen by a three member committee consisting of the physical chemistry coordinator, the chemical physics coordinator, and the director of graduate studies. If any of these individuals choose not to participate in the voting, a substitute faculty member will be chosen by the physical chemistry coordinator.

This award is named in honor of Professor John Overend, who was a faculty member in our department from 1958 until his death in 1984.
